COMDTINST 6700

COMMANDANT NOTICE 6700

CANCELED: 23 APR 1991
23 OCT 1991

Subj: CH-1 to COMDTINST M6700.7A, Health Services Allowance List, Part 3
(Shore Units and Vessels)

1. PURPOSE. This Notice publishes revisions to Commandant Instruction M6700.7A.
2. DISCUSSION. Recent review of Health Services Allowance List, Part 3 (Shore Units and Vessels), has revealed the need for alteration due to changes in therapy and drug availability. This change is intended to minimize waste due to unnecessary procurement and loss due to expiration of medications.
3. SUMMARY OF CHANGES. The enclosed updated list contains required minimums for items in the 6505 Federal stock class (Drugs, Biologicals, and Official Reagents).
4. ACTION. Remove and insert the following pages:

Remove:

page i
pages 2-3 to 2-4
pages 5-1 to 5-5
pages 11-1 to 11-2

Insert:

COMMANDANT INSTRUCTION M6700.7A

Subj: Health Services Allowance List, Part 3 (Shore Units and Vessels)

1. PURPOSE. This manual instruction provides Class 3 units with basic required stock levels of health care materials.
2. DIRECTIVES AFFECTED. The Medical Allowance List, COMDTINST M6700.7, Part 3 is hereby canceled.
3. CHANGES. Changes to this manual instruction will be promulgated by consecutively numbered changes. Additions, deletions, and other changes will also be published in Commandant Notices 6700.
4. ACTION. Unit commanding officers shall ensure that personnel concerned with procuring health care material carefully follow the instructions contained herein.

E. F. BLASSER
Chief, Office of Health Services

CHAPTER 1. HEALTH SERVICES ALLOWANCE LIST INSTRUCTIONS

A. General Instructions.

1. The Health Services Allowance List, COMDTINST M6700.7A is a list of health care materials (books, publications, consumable supplies, minor equipment, sets, kits, and outfits). It sets minimum requirements for Class 3 units.
2. All shore units and vessels without health services personnel assigned are designated as Class 3 as follows:
 - Class 3A Shore units without health services personnel - ten or more personnel assigned
 - Class 3B Shore units without health services personnel - nine or less personnel assigned
 - Class 3C Vessels without health services personnel - ten or more personnel assigned
 - Class 3D Vessels without health services personnel - nine or less personnel assigned
3. Group commanders, captain of the port offices, port security units, stations, etc., shall provide health care support to subunits under their operational control (e.g., search and rescue small craft). This support shall include: first-aid kits and components parts, litters, splints, and other items required by Boat Outfitting Lists, this manual, and operational demands.
4. Each unit is responsible to fund the health care supplies listed in this manual. If unit funds are insufficient, a request with adequate justification for additional funding shall be submitted to the cognizant district commander.
5. Complete requisitioning instructions for the items contained herein are included in this manual and in the following publications:
 - a. Medical Manual, COMDTINST M6000.1 (series);
 - b. Comptrollers Manual.
 - c. Commandant Instructions and Notices;
 - d. Directives, Publications, and Reports Index COMDTN01E 5600; and
 - e. District Instructions and Notices.

- 1-A.6. When health care supplies are ordered from DPSC, use advice code 2D - Advice code 2D means - Furnish exact quantity requested (i.e., do not adjust to unit pack quantity).
7. Coast Guard Reserve units shall continue to obtain health care supply support in accordance with current cognizant district instructions and notices.
 8. Items that are added to this list from time-to-time shall not be requisitioned if a similar item on hand is functionally adequate to accomplish the intended purpose.
 9. Units shall maintain the minimum required quantities listed herein for their respective unit.
 10. Items ordered in excess of the unit's minimum required amounts shall be limited to a three month supply at normal usage rates, with the exception of overseas units which are limited to a six month supply at normal usage rates.
 11. Recruiting stations and other similar units are not required to maintain the minimum required quantities of Class 3 health care materials listed in this manual. Since most of these units are located within close proximity to competent health care, supplies shall be limited to those required by operational demands (i.e., aspirin, bandaids, etc.).
 12. Personnel charged with the custody of health care supplies and equipment shall observe the Defense Supply Agency's established expiration date noted in/on the package container.
 13. Recommendations for additions, deletions, or other changes to the Health Services Allowance List shall be submitted, via the chain of command, to the Commandant (G-KMA).
 14. The below list of "Notes" and their definitions indicate any special requirements for handling or storage of items.

<u>NOTE</u>	<u>EXPLANATION</u>
D	Subject to deterioration in a period of 36 months or less.
F	Subject to damage by freezing. Shall normally be ordered during months of March through October.
I	Flammable or oxidizing.

1-A. 14(cont'd)

<u>NOTE</u>	<u>EXPLANATION</u>
P	Item has a potency period or expiration date.
15.	The following is a list of unit of issues and an explanation of each one.

<u>UI</u>	<u>EXPLANATION</u>
BT	BOTTLE
BX	BOX
CN	CAN
EA	EACH
PG	PACKAGE
RO	ROLL
SL	SPOOL
TU	TUBE

B. Instructions for Requisitioning Health Care Reference Books and Publications.

1. This manual contains a list of the minimum required reference books and publications for all Class 3 units.
2. Publications shall be requisitioned directly from:

<u>Routing ID</u>	<u>Address</u>	<u>Form</u>
NFZ	Navy Publications & Form Center 5801 Tabor Avenue Philadelphia, PA 19120-5099	DD-1348 6 PT. Requisition System Document (Manual)Milstrip or Defense Automatic Addressing System (DAAS)

- C. Report of Shipment (RESHIP). The requisitioner will receive a RESHIP by telephone, teletype, or message for all shipments by commercial carriers, except those to air or water terminals for movement via Defense Transportation System. The following information will be furnished:

- 1-C.1. Bill of Lading (BL) number;
 2. document identification, i.e., Transportation Control Number (TCN); requisition number, contract or purchase order number;
 3. item identification number if other than BL number, such as air bill or air express receipt number;
 4. route (all participating carriers);
 5. carrier identification number if other than BL number, such as air bill or air express receipt number;
 6. flight number, when appropriate;
 7. departure time (date/hour);
 8. estimated delivery time, indicated on the BL as DDD;
 9. deadline delivery time--date/hour (a.m. or p.m.) that item must be returned to refrigeration/freezer or re-iced; and
 10. a request for the requisitioner to contact the local carrier to trace and expedite delivery if not received by the estimated delivery time.

D. Instructions for Reporting Unsatisfactory Shipments and for Reporting Defective or Unsatisfactory Health Care Material.

1. Adjustments for unsatisfactory shipments and billing adjustments fall into the following categories:
 - a. Shortage in Quantity. Amount received is less than the quantity indicated on DOD Single Line Item/Release Receipt Document, DD-1348-1.
 - b. Overage in Quantity. Amount received is greater than quantity indicated on DD-1348-1.
 - c. Material Damaged. Material received in such damaged condition as to render it unusable.
 - d. Material with Latent Defects. Material received in poor condition (no fault of transportation company), such as: potency expired, material deteriorated, etc.
 - e. Lost Shipment. Follow-up reply received from Requisition Processing Point (RPP) indicates material shipped from supply source and not received at the requisitioning unit.
 - f. Duplicate Shipments. Two or more shipments received under the same document number with quantity totaling more than indicated on one document.

1-D.1. g. Erroneous Shipment. Incorrect material received.

2. The following procedures shall be accomplished by the requisitioner to report one or more of the above listed defects:

a. Defects amounting to less than \$100.00 per line item extension cost for each shipment - no action is required. The loss shall be absorbed by the unit concerned. If the total amount lost is deemed excessive by the unit and cannot be absorbed, a request with adequate justification may be submitted to the cognizant district commander for possible assistance.

b. When the single line item extension cost is over \$100.00 and the shortage, damage, or loss is attributed to the carrier, the requisitioner shall prepare and submit a Discrepancy in Shipment Report (SF-361) along with a copy of the Bill of Lading to:

DPSC (Defense Personnel Support Center)
ASCI Section
2800 South 20th Street
Philadelphia, PA 19101

c. When the single line item extension cost is over \$100.00 and the material is received with latent defects, the requisitioner shall Submit a Report of Item Discrepancy (SF-364) to the above address.

3. Defective or unsatisfactory health care material is classified as follows:

a. Type 1. Material determined by use or test to be harmful or defective to the extent that use has caused or may cause death or illness.

b. Type 2. Material suspected of being harmful, defective, deteriorated, or otherwise unsuitable for use.

c. Type 3. Equipment determined to be unsatisfactory because of malfunction, design, defects (attributable to faulty material, workmanship and/or quality inspection), or performance.

4. Report defective or unsatisfactory health care material in accordance with instructions contained herein. However, prior to submitting the report, have the inadequacy or undesirability of the item thoroughly evaluated by professional, supply, or maintenance personnel where practical. Report only those items that are injurious or unsatisfactory due to inherent characteristics. Do not report items involving idiosyncrasies or sensitivities of individual patients.

- 1-D. 5. When an item is suspected or determined to be Type 1 or Type 2 defective or unsatisfactory, immediately suspend the entire quantity on hand from issue and use. To protect patients from possible accidental use of suspected defective material, all suspected/suspended items regardless of location shall be segregated and conspicuously marked to prevent issue or use pending receipt of disposition instructions.
6. If required, samples of material reported as defective or unsatisfactory will be requested from the reporting unit. Samples of material furnished shall, unless otherwise indicated, be expended from the records and accounted for as a loss by survey referencing this manual as authority.
7. Reports of defective or unsatisfactory material shall indicate at the beginning whether they are Type 1, Type 2, or Type 3 complaints. Reports of each type shall be submitted in accordance with the instructions specified below:
- a. Type 1 Complaint.
- (1) Submit by PRIORITY MESSAGE to DPSC Philadelphia, PA/Medical.
- (2) Information addressees include:
- (a) Commandant (G-KOM);
 - (b) Defense Medical Standardization Board (DMSB), Ft. Dietrich, MD;
 - (c) NAVMEDMATSUPPCOM, Ft. Dietrich, MD; and
 - (d) Cognizant District or Area Commander.
- (3) Information required:
- (a) NATO Stock Number - item name (report all stock numbers appearing on the unit containers);
 - (b) lot number/control number/manufacture's serial number/model number, as appropriate;
 - (c) name of manufacturer, date of manufacture, date packed, and expiration date;
 - (d) contract number and name of contractor if other than manufacturer (use extreme care when attempting to determine the contract or purchase order number when defects are the contractor's responsibility);

- 1-D.7.a.(3)
- (e) source from which material was received;
 - (f) cause of complaint, defect, or malfunction;
 - (g) total number of reactions of any type;
 - (h) the number of severe or unusual reactions;
 - (i) number of adverse reactions requiring hospitalization and length of hospitalization;
 - (j) describe in detail the nature of adverse reactions (fever, symptoms, etc.) including the age, sex, and other significant data concerning each patient to whom the material was administered;
 - (k) total number of persons to whom the material was administered or number of incidents wherein the failure of equipment to function properly caused untoward patient reactions;
 - (l) complete details of circumstances under which the material was administered and the techniques used;
 - (m) quantity suspended, if equipment, quantity unfit for issue; and
 - (n) name and telephone number of personnel most familiar with the case.

b. Type 2 and 3 Complaints.

- (1) Submit a letter report, original and four (4) copies, to:

Commander
Defense Personnel Support Center
Directorate of Medical Material (Code ATQ)
2800 South 20th Street
Philadelphia, PA 19101

- (2) Provide additional copies to:

- (a) Commandant (G-KOM)
U. S. Coast Guard
Washington, DC 20590-0001
- (b) Naval Medical Material Support Command
Bureau of Medicine and Surgery
3500 South Broad Street
Philadelphia, PA 19145

1-D.7. b. (3) Information required:

- (a) National Stock Number and item identification (Report all stock numbers appearing on the unit containers);
- (b) lot number/control number/manufacturer's serial number/model number, as appropriate;
- (c) name of manufacturer, date of manufacture, date packed, and expiration date;
- (d) contract number and name of contractor if other than manufacturer (use extreme care in attempting to determine the contract or purchase order number when defects are the contractor's responsibility;
- (e) source from which the material was received;
- (f) cause of complaint, defect, or malfunction;
- (g) quantity suspended - if equipment, quantity unfit for issue;
- (h) annexes - photographs and drawings of equipment, when they will help describe or substantiate the complaint; and
- (i) a statement covering the hazards inherent in the continued use of the material. (The statement of inadequacy or undesirability should be specific regarding the characteristics or performance features which are the subject of the complaint, and in the case of electronics, electrical, or electro-mechanical equipment, furnish the detailed identification of specific parts, components, or circuits.)

8. Material complaints are processed as follows:

- a. The Defense Personnel Support Center (in coordination with the Defense Medical Material Board for Type 1 complaints) will evaluate all reports of defective or unsatisfactory material, and will notify Commandant (G-KOM) of the findings. The units that initially submitted the reports will be notified of DPSC's findings by Commandant (G-KOM).
- b. Material that is to be suspended from issue and use at all Coast Guard activities shall be listed in Instructions or Notices by Commandant (G-KMA). If the suspension action is a result of a Type 1 complaint, Commandant (G-KOM) will issue an ALDIST to that effect.
- c. When the reported material is not to be suspended from issue and use, but is nevertheless to be surveyed and destroyed, such instructions will be issued by Commandant (G-KOM).

CHAPTER 2. INSTRUCTIONS FOR MAINTAINING, ISSUING, AND INVENTORYING
HEALTH CARE SUPPLIES AND EQUIPMENT

A. General.

1. All Class 3 units must maintain the minimum quantities of material as listed in this manual. In addition, all units shall maintain an operating level of consumable supplies that will allow sufficient lead time for routine requisitions.
2. In order to maintain the requirements of paragraph 1, an inventory of all consumable supplies and equipment shall be accomplished at least once every six (6) months. During this inventory, a careful inspection must be made for any signs of deterioration which may render the item harmful, or otherwise unfit, even though not expired. To properly document the inventory, Stock Record Card (NAVSUP Form 766) may be used.
3. The necessity for issuing the oldest stocks first cannot be over emphasized. Class 3 units shall maintain a "First in/First out" dispensing/issuing system for all health care supplies and equipment, unless potency or shelf life periods for the new materials are less than that of the stock on hand.
4. Personnel charged with the custody of health care supplies and equipment shall observe the established potency periods. Potency dated material is material having a definite storage period (expiration date). When an expiration date is given as month and year only, the material expires on the last day of the month.
5. All consumable materials aged beyond the established potency date, as noted in this manual and on the package container, regardless of physical condition, shall be destroyed by burning or flushing down the drain and in accordance with the provisions of the Medical Manual, COMDTINST M6000.1. In addition, any consumables showing signs of deterioration or suspected of being not fit for health care purposes, shall be disposed of in the above manner.
6. Antidote Lockers shall be inspected quarterly to ensure an adequate and full inventory. Expired or deteriorated supplies shall be destroyed and replaced.

- 2-4.7. Bandages, battle dressings, and other health care supplies of this nature, which are expired may be used for training or other non-medical uses. They shall be clearly marked "NOT FOR MEDICAL USE."

B. First Aid Kits (General Purpose, Liferaft, and Individual).

1. All units must be supplied with first aid materials. First aid kits are to be provided in all areas of personnel concentrations consistent with the number of personnel assigned in a given area or battle station.
2. First Aid Kits shall be colored green and marked with a white cross (each bar to be 2 inches by 6 inches). The words: FOR EMERGENCY USE ONLY shall appear above the white cross. Routinely advise unit personnel that these supplies are for emergencies only and are not for routine use.
3. First Aid Kit, General Purpose (NSN 6545-00-116-1410). Quantities of these first aid kits shall be maintained as required by individual class designations and shall be located throughout the unit (galley, radio room, bridge, engine rooms, repair lockers, etc.,) for emergency. See FIGURE 2-1 for a list of components.
4. First Aid Kit, Liferaft (NSN 6545-00-168-6893). These first aid kits shall be used in liferafts, lifeboats, motorboats, whaleboats, aircraft and other small watercraft. See FIGURE 2-2 for a list of components.
5. First Aid Kit, Individual (NSN 6545-00-823-8165). Quantities of these first aid kits shall be maintained as required by individual class designations. Custody receipts will be obtained and maintained on file for these kits which are issued to individuals. See FIGURE 2-3 for a list of components.
6. Inspection.
 - a. First aid kits (Liferaft, and General Purpose) shall be inspected once a quarter to ensure adequate and full inventory.
 - b. First aid kits which are located in inflatable liferafts shall be inspected in connection with the regular preventive maintenance service of the liferaft which is conducted normally every six (6) months.

FIGURE 2-1

FIRST AID KIT, GENERAL PURPOSE

		INSTRUCTION CARD, ARTIFICIAL RESPIRATION, MOUTH-TO-MOUTH RESUSCITATION	EA	1

* The empty plastic bottles in this kit may be used for additional medications as required for operational missions.

** The quantity required is less than the packaged quantity.

CHAPTER 3. REQUIRED HEALTH CARE PUBLICATIONS

- A. The following is a list of required medical books and publications that must be maintained onboard the unit. All items are standard stock.

<u>ROUT-ID</u>	<u>NSN/DESCRIPTION</u>	<u>MINIMUM REQUIRED FOR CLASS 3</u>				
		<u>U/I</u>	<u>A</u>	<u>B</u>	<u>C</u>	<u>D</u>
NFZ	0510-00-097-0000 POISONS, OVERDOSES, AND ANTIDOTES, NAVMED P-5095	EA	1	1	1	1
NFZ	0510-00-097-0080 POISONOUS SNAKES OF THE WORLD, NAVMED P-5099	EA	1	1	1	1

CHAPTER 4. MISCELLANEOUS ITEMS (1000-6499)

- A. The following is the minimum requirement for miscellaneous items that are required onboard shore units and vessels. All items are standard stock.

<u>ROUT-ID</u>	<u>NSN/DESCRIPTION</u>	MINIMUM REQUIRED FOR CLASS 3				
		<u>U/I</u>	<u>A</u>	<u>B</u>	<u>C</u>	<u>D</u>
S9G	2090-00-368-4792 LOCKER MEDICAL FIRST AID OR POISON ANTIDOTE, WATERTIGHT ALUMINUM, 2 SHELVES, 6 IN DEEP TURNED UP 1 IN ON FRONT EDGE, DOOR FASTENS AT SIDE WITH CLIPS FOR BULKHEAD SECURING, OUTSIDE DIMENSIONS 20 X 16-1/2 X 8-1/4 IN	EA	1	1	1	1
FSC	5335-00-373-2800 WIRE FABRIC, 5-1/4 X 36 IN WIRE MESH SPLINT, USE WITH PADDING FOR IMMOBILIZATION OF FRACTURES OR SPRAINS	RO	1	1	1	1

CHAPTER 5. DRUGS, BIOLOGICALS AND OFFICIAL REAGENTS (6505)

- A. The following are minimum requirements for drugs and biologicals which shall be maintained. All items are standard federal stock items and available from the Defense Personnel Support Center (DPSC Advice Acquisition Code "D").
- B. To minimize waste, items with the shortest expiration date must be used first. Units should order medications using advice code "2G" to receive the most recently dated items.
- C. Items which will not be used prior to expiration will, when feasible, be rotated to health care facilities for use prior to expiration.
- D. Drug items required to maintain an Antidote Locker, as required in Chapter 2-C, are included on this list.
- E. Prescription drugs, other than those contained herein, must be labeled for the individual for which they are prescribed and left in the container in which they are received from the pharmacy.
- F. Page 5-2 provides a cross reference for identifying the required drugs by generic/NSN nomenclature and the commonly used brand name.

MINIMUM REQUIRED FOR CLASS 3:

NOMENCLATURE	NSN	U/I	3A	3B	3C	3D
